

Automated DNA and RNA Extraction

Extract DNA out of any environmental sample

Only consumable is Agarose !

- 60uL extraction volume in buffer
- Uses electrophoresis, no inhibitors or salts or residues

PCR and qPCR

Thermal Temperature Test Film

- Works on any PCR or qPCR machine.
- Provides evidence of uneven heating

Very Low Cost PCR :

EconoTaq[®] DNA Polymerase

- Great Taq Polymerase performance at a low price.
- Choice of reaction buffers, with or without MgCl₂.
- Non-proofreading Polymerase

Free Sample Available

Accura[®] High-Fidelity Polymerase

- High-Fidelity: Ideal for cloning and protein expression
- Flexibility: HF and GC buffers included to handle even the toughest targets
- Performance: Robust amplification and sensitivity
- Price: The most cost effective high-fidelity polymerase available

Low cost regular Taq

Low cost HiFi
